FOLLOW-UP APPOINTMENTS

- Neurologist Dr. Park - within 7 days for follow-up
- Anticoagulation clinic - within 3 days for INR check
- Speech therapy - 3 times per week for 8 weeks
- Physical therapy - 3 times per week for 8 weeks
- Occupational therapy evaluation - within 5 days
- Primary Care - within 14 days

ACTIVITY RESTRICTIONS

- No driving until cleared by neurologist (minimum 3-6 months)
- Supervised ambulation only - risk of falls
- Do not operate heavy machinery
- Fall prevention: use grab bars, remove loose rugs, ensure good lighting

DIETARY RESTRICTIONS

- Consistent Vitamin K intake daily if on warfarin
- Low sodium diet: less than 1500mg per day
- No alcohol - interferes with warfarin and increases bleeding risk
- Stay well hydrated

GO TO THE EMERGENCY ROOM IMMEDIATELY IF YOU EXPERIENCE

- Sudden numbness or weakness in face, arm, or leg especially on one side

- Sudden confusion or trouble speaking or understanding speech
- Sudden vision problems in one or both eyes
- Sudden severe headache with no known cause
- Sudden trouble walking, dizziness, or loss of balance
- Any bleeding that will not stop (due to blood thinners)

CALL YOUR DOCTOR WITHIN 24 HOURS IF YOU NOTICE

- New or worsening weakness or numbness
- Increased confusion or memory problems
- Unusual bruising or prolonged bleeding from minor cuts
- Dizziness or falls
- Headache that is new or different from usual
- Missed INR check appointment

ADDITIONAL NOTES

IMPORTANT: Patient is on MULTIPLE blood-thinning medications.

Do NOT take any NSAIDs (ibuprofen, naproxen) without physician approval.

All new medications must be reviewed by care team before starting.
